Introduction

What does it do?

- Green Cars is a database for cars with environment advantages.
- Green Cars is a case study for the TYPO3 frontend engine browser too.
- It explains how to develop, program and publish a TYPO3 extension supported by the TYPO3 frontend engine Browser
- Both Green Cars and Browser are out of the box.
- You have to create your own CSS only.

Case Study in German Language

- The case study Green Cars is in German language only.

Documentation online

This Manual in PDF format

You find this manual as PDF file at

- doc/manual.pdf
- http://typo3.org/extensions/repository/view/green_cars/current/info/?tx_terfe_pi1%5BdownloadFile%5D=doc%252Fmanual.pdf

Case Study – Step-by-Step Tutorial

You find the step-by-step tutorial (German language) at

- doc/fall_studie.pdf
- http://typo3.org/extensions/repository/view/green_cars/current/info/?tx_terfe_pi1%5BdownloadFile%5D=doc%252Ffall_studie.pdf

Further Information

Browser Manual and Browser Tutorial Basics

Manual: The Browser has it's own manual (with the reference of course).

- HTML <http://typo3.org/documentation/document-library/extension-manuals/browser/current/>
- PDF: http://typo3.org/extensions/repository/view/browser/current/info/?tx_terfe_pi1%5BdownloadFile%5D=doc%252Fmanual.pdf

Tutorial Basics: A lot of step-by-step introductions.

- HTML: http://typo3.org/documentation/document-library/extension-manuals/browser_tut_basics_en/current/
- PDF: http://typo3.org/extensions/repository/view/browser_tut_basics_en/current/info/?tx_terfe_pi1%5BdownloadFile%5D=doc%252Fmanual.pdf

Illustration 11:
Case Study – Step-by-Step Tutorial

Installation

Extension Manager

- Install this extension (green_cars).
- Green Cars will suggest to install the extension Browser – the frontend machine (extKey: browser). Please install it.

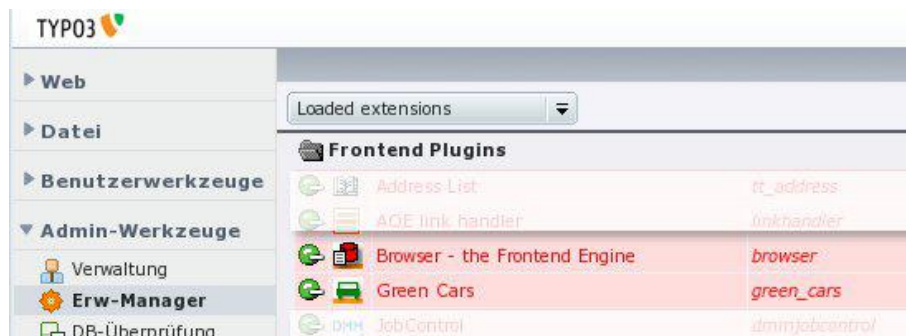

Illustration 12: Extension Manager with the loaded Extensions browser and green_cars

Page Tree

- Insert the page "gruene-autos.org" (in our example below it has the ID 2957).
- Insert a sysfolder "Grüne Autos" (in our example below it has the ID 2958).

Illustration 13: Page and SysFolder

Extension Template

- Add an extension template to your page "gruene-autos.org" (2957)
- We recommend to use for the name of the template this syntax:
 - +type_page_templateID
 - We call it: +page_grueneautos_979
- Include the static templates from extensions:
 - Browser (browser)
 - Browser (green_cars)

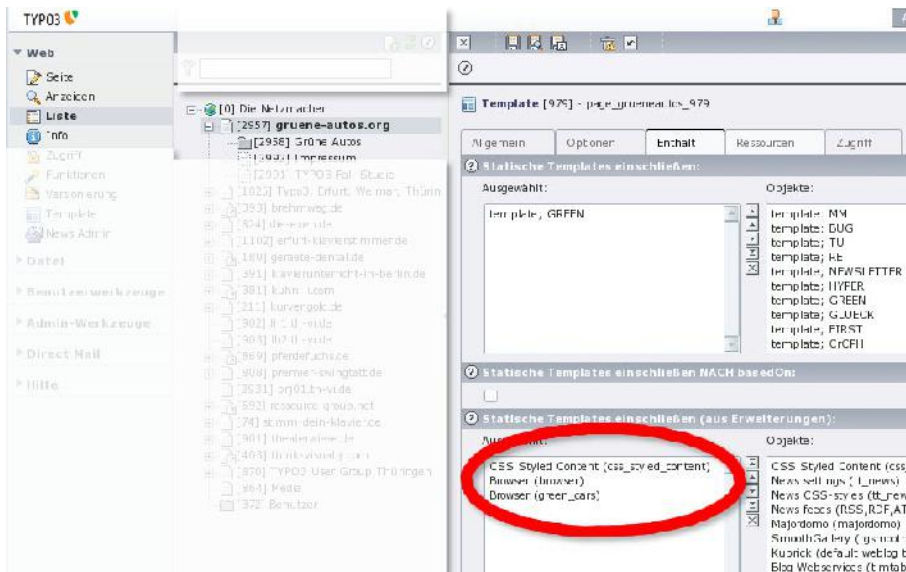

Illustration 14: The extension template includes the static templates browser and green_cars

Plugin

- Insert an extension template. Include static from extensions: Browser (green_cars).
- Insert the plugin "Browser" and choose as the startingpoint the sysfolder "Green Cars (Data)".

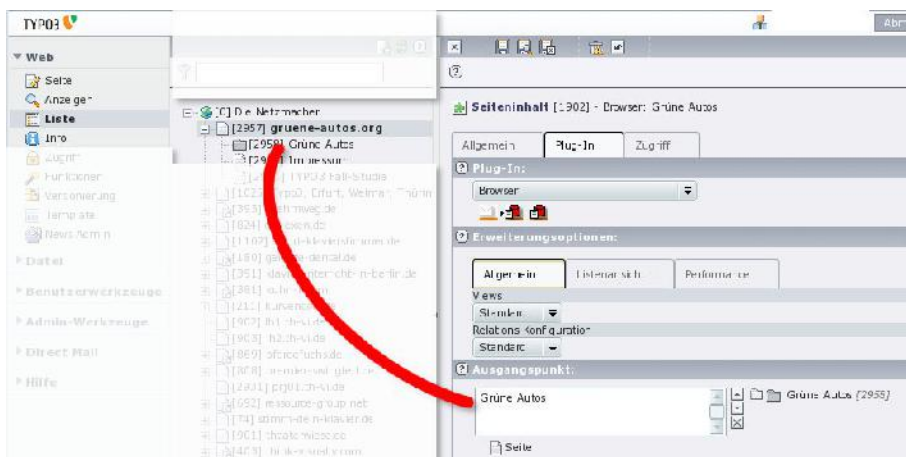

Illustration 15: Plugin Browser with the startingpoint "Grüne Autos" (SysFolder)

Reference

This extension is a teamwork with the Browser. It hasn't any own TypoScript.

Functional Schematic

Green Cars is a Teamwork with the Browser

The illustration below is a illustration out of the Browser manual:

- <http://typo3.org/extensions/repository/view/browser/current/>

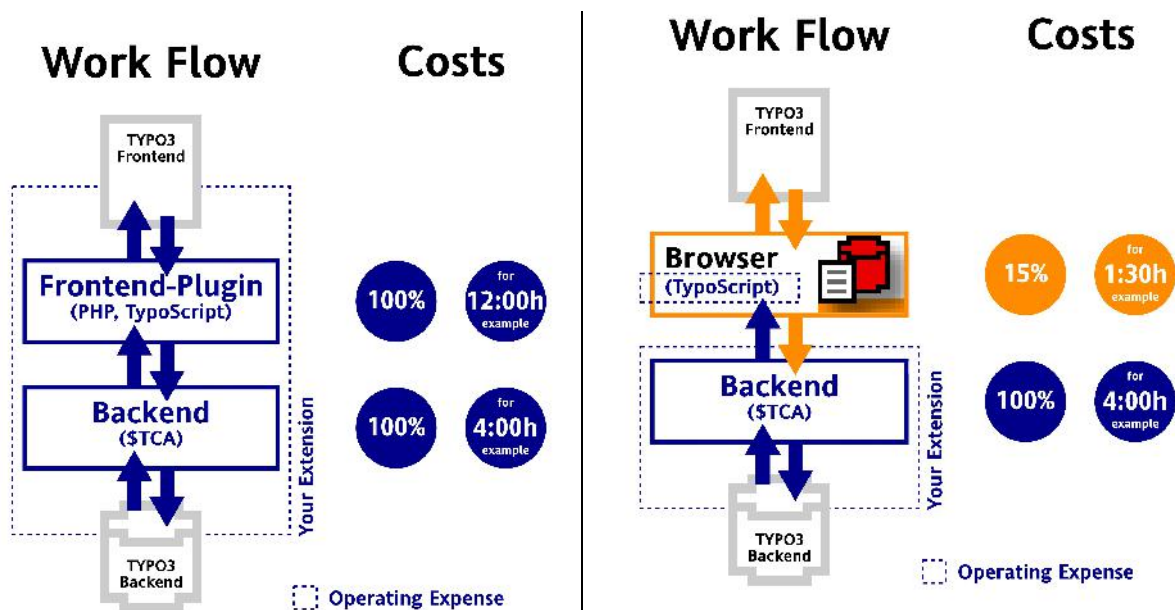

Illustration 16: Common way of TYPO3 extension development.

Illustration 17: TYPO3 extension development with the Browser.

The common way of TYPO3 extension development:

- Extensions have there own frontend plugin.
- Extensions have own PHP code for the frontend rendering.

TYPO3 extension development with the Browser:

- Green Cars hasn't any own frontend plugin.
- Green Cars has a TypoScript template for the Browser extension only.

We developed the Green Cars extension in teamwork with the Browser like in the illustration above on the right hand, because we could save a lot of development costs. And it is a good idea for the future too. We will be able to extend the database in the backend and the rendering in the frontend very flexible and cost-effective.

If you want to change the design or some functionality in the frontend you have to change the TypoScript of the extension Browser.

plugin.tx_browser_pi1

Investigate the Configuration of Green Cars

If you want to investigate the Green Cars TypoScript template, take a look in

- the TypoScript Object Browser or in
- static/setup.txt (below you find a cutout).

There are three good reasons to investigate the TypoScript:

- You want to change a view in the frontend.
- You want to add new fields in the Green Cars database.

- You want to use the Browser for your own database.

If you understand the snippet below, you should be able to change a lot of functionality in the frontend and to use the Browser as the frontend plugin for your database with a minimum of costs.

Please respect that this manual is the Green Cars manual and not the Browser manual. If you like an in-depth analysis take a look in the Browser manual.

- <http://typo3.org/extensions/repository/view/browser/current/>

TypoScript Object Browser

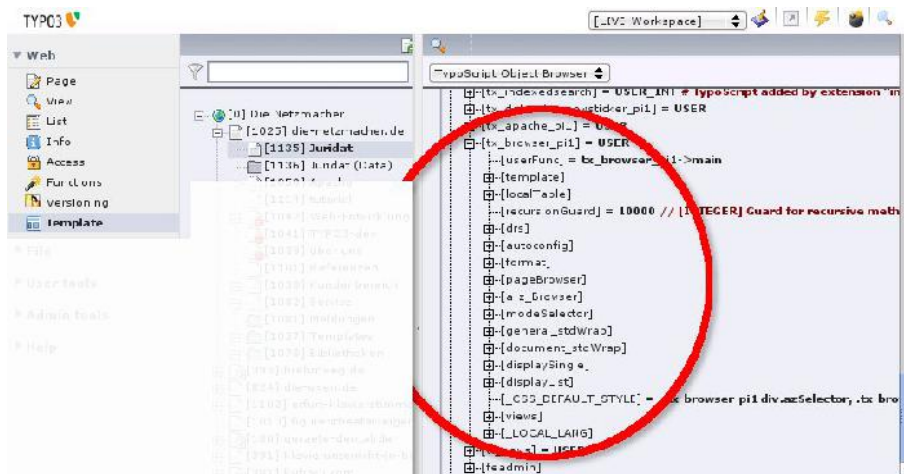

Illustration 18: TypoScript Object Browser with the tx_browser_pi1 array

Be aware:

- There is no plugin: tx_greencars_pi1
- There is a plugin: tx_browser_pi1

If you want to add or delete a view or add or delete a table field in a view please open the array

- tx_browser_pi1.views

TypoScript

Cutout of static/browser/setup.txt.

```

1.plugin.tx_browser_pi1 {
2.  template {
3.    file = EXT:green_cars/res/default.tmpl
4.  }
5.  ...
6.  views {
7.    list {
8.      1 {
9.        select (
10.          tx_greencars_main.co2,
11.          tx_greencars_main.image,
12.          tx_greencars_manufacturer.title,
13.          tx_greencars_main.title,
14.          tx_greencars_main.consumption_average
15.        )
16.        ...
17.      }
18.    }
19.    single {
20.      1 {
21.        select (
22.          tx_greencars_main.image,
23.          tx_greencars_main.imagealttext,
24.          tx_greencars_main.imagetitletext,
25.          tx_greencars_manufacturer.title,
26.          tx_greencars_main.title,
27.          tx_greencars_main.speed,
28.          tx_greencars_main.co2,
29.          tx_greencars_main.consumption_in_town,
30.          tx_greencars_main.consumption_outof_town,
31.          tx_greencars_main.consumption_average,
32.          tx_greencars_main.price,
33.          tx_greencars_engine.title,
34.          tx_greencars_type.title
35.        )
36.      }
37.    }
38.  }
39.}

```

Helpful suggestions

If you have helpful suggestions, feel free to contact me: wildt.at.die-netzmacher.de.

Further Information

About the plugin icon

The concept of the icon:

- The green car should symbolize the focus on environmental aspects..
- The color yellow is the color of *Die Netzmacher*, the company which created the Green Cars.

Other extensions published by Die Netzmacher

- Browser - The Frontend Engine. It displays content from related tables. You need one line typoscript for a result list with a search form, a record browser and an a-z browser. Images are wrapped self-acting. SEO, Search Engine Optimisation is integrated. DRS - Development Supporting System - supports Bugfixing and Development.
<http://typo3.org/extensions/repository/view/browser/current/>
- Browser for BZD Staff Directory. List view and single view for the extension BZD Staff Directory. It is out of the box. You can edit the views by TypoScript. You can add fields and whole views.
http://typo3.org/extensions/repository/view/browser_bzdstaffdirectory/current/
- Browser for Virtual Civil Services - List views and single views for the extension Virtual Civil Services (civserv) . It supersedes smarty and enables SEO - search engine optimisation -, Real URL and the TYPO3 cache management. It is out of the box. It You can edit the views by TypoScript. You can add fields and whole views.
http://typo3.org/extensions/repository/view/browser_civserv/current/
- Juridat - Database for Juridical Data. Juridat provides a juridical data base with backend functionality. Juridat is out of the box. It is a teamwork with the Browser.
<http://typo3.org/extensions/repository/view/juridat/current/>
- logical_form: A frontend plugin for evaluating forms. I.e you can evaluate mail addresses.
http://typo3.org/extensions/repository/view/logical_form/current/
- Majordomo: For subcribing to and unsubscribing from a majordomo mailing list.
<http://typo3.org/extensions/repository/view/majordomo/current/>
- rm_staticfile: Improve your performance! This extension enables the delete of static files, which where generated by nc_staticfilecache. It is a team play with the TYPO3 cache management, ttnews, ttnewscache, sg_newsplus and sg_zfelib.
http://typo3.org/extensions/repository/view/delete_staticfile_by_3party/current/
- seo_dynamic_tag: Search Engine Optimisation. You can generate values dynamically with this extension especially for the <title>-tag, for the <meta>-tag description and the <meta>-tag keywords.
http://typo3.org/extensions/repository/view/seo_dynamic_tag/current/
- tt_news Marker (extkey: ttnews_marker) enables to add any marker to a tt_news HTML template including links. Any marker has the std_wrap property.
http://typo3.org/extensions/repository/view/ttnews_marker/current/
- SQL tt_news select configuration (extkey: ttnews_selectconf) enables to select tt_news by any SQL clause. The extension adds an andWhere clause to the SQL query of the tt_news plugin. I. e. it is possible to display tt_news items in dependence on the ownership of a fe_user.
http://typo3.org/extensions/repository/view/ttnews_selectconf/current/

To-Do List

Nothing to do.
